TECO 60th Anniversary video

The strength of a global brand. Comfort you can rely on.

Welcome Home to TECO

ENGINEERED TO PERFORM

For over 60 years we have delivered market leading electrical motors worldwide. Powering the largest machines in ships, mines, quarries, plants & refineries. Our strength is diversification with expertise in state of the art products and services across telecommunications, IT solutions, automation, wind turbines, electric vehicles and home appliances.

\$3Billion USD Net Worth

THE QUIET ACHIEVER

In Australia, we are the market leader in industrial motors and have been for over 30 years. This has paved the way for our success in home appliances - air conditioners, fridges, freezers, washing machines and clothes dryers. We supply to many mine sites and commercial businesses in the harshest places from the Pilbara to Kalgoorlie to Papua New Guinea. Our designs, functionality and performance are backed by our in-home dedicated service network.

40,000+ Employees

QUALITY & RELIABILITY

Our heavy industrial expertise nurtures our commitment to quality and reliability in all our products. Whether it is an air conditioner for a small room or a multi split system to cool or heat your entire home - TECO has you covered with the strength of our global brand and comfort you can rely on.

Pulsator Wash Action

With a powerful pulsator, the TECO top load clothes washers make light work of heavily soiled laundry but also gentle on delicate fabrics.

6 Wash Programs

Each wash program has been Engineered To Perform and wash most fabrics. Everything from heavily soiled clothing to delicate fabrics.

Child Lock

Prevent little fingers or accidental button presses by activating child lock on the control panel.

Water Level Selection

Choose between six (6) predefined water levels to ensure each wash has sufficient water depending on the load size.

Auto Power Off

Once the wash program is complete, the TECO clothes washer automatically powers off, saving you energy.

LED Digital Display

Easy to read digital display. Multi purpose display, makes it a breeze to select a program, functions and ensure correct selection for each wash.

Detergent & Softener Dispenser

Each TECO Top Load Clothes Washer is fitted with a convenient detergent and softener dispenser. This ensures even distribution at the right time during the wash program. Ensure correct dosage is used as recommended by the detergent and softener manufacturer which can be found on the packaging.

700 RPM Spin Speed

With a powerful motor that can produce 700 RPM spin speed, the TECO Top Load washes and spins at incredible speed ensuring efficient water removal.

Delay Start

1 ~ 48 Hour delay start option

Auto Unbalance Sensor

No more wobbling and banging from your clothes washer. With a TECO Top Load Clothes Washer, the unbalance sensor alerts you whenever the laundry shifts to one side requiring redistribution around the bowl.

Twin Tubs

Perfect for regional and rural locations

Twin Tub Washing Machines may not be new technology but when it comes to conserving water in drought affected areas, a twin tub will allow you the option to drain grey water aside for alternate use.

Dual Independent Motors

With 2 motors, 1 driving the wash performance and 1 driving the spin performance, allowing you to wash and spin independently. Also improving the longevity of your new appliance.

Simultaneous Wash & Spin

With the TECO Twin Tub you are able to use the wash cycle and the spin cycle simultaneously, saving you time and with dual motors, simultaneous wash & spin is a breeze.

Dual Water Inlets

Allows convenient set up for water to enter the wash bowl and spin tub, without having to disconnect and reconnect.

Overflow Protection

If you happen to forget filling your wash bowl with water, the uniquely designed bowl has two layers, water will overflow in the second bowl and will drain away when you use the drain cycle, help preventing flooding and wasting water. We do recommend that you keep an eye on when filling your machine with water.

Hidden Controls

Easy to use controls are safely hidden under the easy lift flap to protect against dust, dirt and water getting into the controls. We recommend this be closed when using your machine.

1300 RPM Spin Speed

Ensures quick and thorough removal of water from your washed items. We recommend that delicate items be hand rung dried as the spin speed may distort this type of fabric.

Internal Drain Pump

Older twin tubs used to be gravity drained, no longer with TECO Twin Tubs, the internal drain pump will ensure the waste water is pumped away quickly to allow you to move onto the next wash. More importantly will give you the option to drain grey water aside for alternate use. Providing you the ability to save water and maximise every drop.

PLEASE NOTE: The drain pump is located to the right side of the unit and therefore is designed to drain to a tub/basin point on the right side. Extending the hose to accommodate left side draining is the responsibility of the consumer.
